

bring more food (we don't  
believe in guards) the third

button you press only when  
you strap yourself in. be

careful when you do that you  
lock these sleeves around

the wrist close as cufflinks.  
yessir it is up to you &

i quite agree it is peculiar  
how few last out seven days

but the voltage is high & you  
burn very quick indeed. it is

ultimately your choice & the  
only limit upon reality

however i must go &  
prepare for the late batch

## **BOTANICAL GARDENS**

sometimes when I walk by trees  
the cool dark waters of shadows  
in intimate depth of leaves and branch  
touch me,  
worlds are of shadows  
for those who see  
clots pierce the days  
or reach for nights still behind the sun.
