

the electric chair

on the table you will
find cheese & biscuits

so please take your coat
off as we don't usually

stand on ceremony finding
informality preferable

under the circumstances.

we believe our guests should
be as comfortable as

possible even indulging a
little those things which

might have been before
just out of reach; we have

available women of various
ages & types also & if

you should prefer boys
or perhaps beating (there

have been quite a few who
seem fond of that which is

surprising here but i
can tell you some stories

later) we hope you will
not mind those straps and

buckles on the chair but
we do try to keep the wires

to a minimum & discreet.
that button you press for

music, the other is for the
watcher to come & talk or

bring more food (we don't
believe in guards) the third

button you press only when
you strap yourself in. be

careful when you do that you
lock these sleeves around

the wrist close as cufflinks.
yessir it is up to you &

i quite agree it is peculiar
how few last out seven days

but the voltage is high & you
burn very quick indeed. it is

ultimately your choice & the
only limit upon reality

however i must go &
prepare for the late batch

BOTANICAL GARDENS

sometimes when I walk by trees
the cool dark waters of shadows
in intimate depth of leaves and branch
touch me,
worlds are of shadows
for those who see
clots pierce the days
or reach for nights still behind the sun.

MARIA FRESTA
